   < Resume not up to date… >

Software Engineer Intern, Clearwater Analytics, Boise ID   Summer 2016

   Worked with an existing team with the primary responsibility of maintaining and improving an admin and monitoring web app for the services the team provides. Investigated and implemented automatically profiling batch Java jobs and provided a way for teams to easily visualize profiling results with flame graphs.

Software Engineer Intern, Clearwater Analytics, Boise ID   Summer 2015

   Worked with a team of interns to design and build a dashboard (SPA) that displayed the progress of thousands of accounts' progress through several of the company's services.

Computer Technician, University of Utah IT   2013 - 2016

   Helped serve as a single point-of-contact for the campus IT department troubleshooting and categorizing a wide range of technical problems, providing above industry standard customer service as a team.

SKILLS

   Well-versed in Javascript/TypeScript (Angular, NPM), Swift/Objective-C (Cocoa Touch), Java (Maven, Jersey)
   Knowledge of C, C++, C#, etc…
   Able to use Git or SVN with large projects in a team environment.
   Able to work with and manage remote servers, including stand-alone, Amazon EC2, and Azure.

   Have self-published several apps on the Apple iOS App Store.
